---

<b>Department/Group:</b>	Data Analysis	<b>Location:</b>	On Site Noida
--------------------------	---------------	------------------	---------------

## ROLE AND RESPONSIBILITIES

---

- Conduct thorough financial assessments of current and potential suppliers to evaluate their financial stability and risk.
- Analyze financial statements, including income statements, balance sheets, and cash flow statements, to assess the financial health and performance of suppliers.
- Develop and maintain financial models to support supplier assessments and risk analysis.
- Prepare detailed reports and presentations summarizing findings and providing recommendations based on financial analysis.
- Monitor financial trends and market conditions that could impact supplier performance and risk levels.
- Collaborate with procurement and supply chain teams to ensure alignment on supplier selection and risk management strategies.
- Maintain an up-to-date database of supplier financial information and assessments.
- Assist in the development and implementation of policies and procedures for supplier financial assessments.
- Provide insights and recommendations to senior management to inform strategic decision-making.

## LOOKING FOR SOMEONE WITH

---

- Bachelor's degree in Finance, Accounting, Economics, or a related field. A master's degree or relevant professional certification (e.g., CFA, CPA) is a plus.
- Minimum of 2 years of experience in financial analysis, with a focus on supplier assessments or a similar area.
- Strong analytical skills with the ability to interpret complex financial data and metrics.
- Proficiency in financial modeling and use of financial analysis tools and software (e.g., Excel, SAP, Oracle).
- Excellent written and verbal communication skills, with the ability to present complex information clearly and concisely.
- High attention to detail and strong organizational skills.
- Ability to work independently and as part of a team in a fast-paced environment.
- Strong problem-solving skills and the ability to make data-driven decisions.
- Experience in the manufacturing, retail, or logistics sectors.
- Knowledge of supply chain management and procurement processes.
- Familiarity with financial risk assessment methodologies and best practices.
